Summary

Software Engineer at Alpide, shipping features across a cloud ERP — **sales, purchase, inventory, CRM, HRMS and manufacturing** — on Java/Spring Boot microservices, MySQL, React and React Native. Outside work, I design and ship my own products end to end, from database schema and APIs to web and mobile clients.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, Python
Backend: Spring Boot, Spring Security, JPA/Hibernate, Spring Cloud, REST APIs, Node.js, Express, FastAPI
Frontend & Mobile: React, Redux, Ant Design, Tailwind CSS, React Native, Expo
Databases: MySQL, PostgreSQL, Prisma, Views, Stored Procedures, Schema Design
Testing & Tools: JUnit 5, pytest, Jest, GitHub Actions, Docker Compose, Git
Domain & AI: ERP (Sales, Purchase, Inventory, CRM, HRMS, Manufacturing/MRP), LangGraph, LLM APIs, OCR

Experience

Software Engineer, Alpide ERP – Noida July 2026 – Present

- Built an **RFQ comparison sheet** that ranks supplier quotes per item, supports split awards and generates one purchase order per supplier by reusing the existing PO pipeline.
- Added sales-order close, quotation profitability and configurable **FIFO stock deduction** on quote-to-order conversion; built inventory ledger and movement reports on MySQL views and stored procedures.
- Implemented a **transaction audit trail** across 32 entity types using JPA entity listeners and asynchronous writes in a separate transaction, so an audit failure never rolls back a business change.
- Designed MRP runs and a **finite-capacity scheduling engine** that books work orders against shift calendars and machine, labour and equipment resources, with side-effect-free previews.
- Built finance screens (reconciliation, expenses, payments) and Node.js PDF templates for business documents.

Software Engineer Intern, Alpide ERP – Noida August 2025 – May 2026

- Integrated **Exotel** calling into the CRM via webhooks; built email campaigns and multi-account Google/Microsoft mail and calendar sync.
- Delivered **subcontract purchase orders** with material issue slips, returnable challans, store requisitions and goods-receipt quality checks.
- Shipped HRMS features (leave, shifts, overtime), debugged sales, purchase and accounting flows, and built shop-floor execution on web and React Native.

Projects

Klyro (formerly Forkify ERP) | Java 17, Spring Boot 3, MySQL, React 19, React Native Completed | Live | GitHub

- Built and shipped a multi-branch restaurant ERP — recipe costing, inventory, procurement, inter-branch transfers and QR ordering — on one JWT-secured API serving web and mobile.
- Audited every module and **fixed 12 defects**, including disabled users still able to sign in, transfers driving stock negative and a Hibernate cascade duplicating recipe ingredients.
- Added **22 backend integration tests** (JUnit 5, H2) and a GitHub Actions CI pipeline.

LifeSnail | Node.js, Express, PostgreSQL, Prisma, React, React Native, FastAPI Live

- Personal life OS: expenses, Splitwise-style groups (four split modes, debt simplification), budgets, fitness and food logging, and reminders across web and mobile.
- Built one command pipeline for voice and text where a **deterministic parser handles common commands without an LLM call**, with automatic fallback across Groq, Gemini, OpenRouter and OpenAI.
- Restricted the AI assistant to 16 validated tools; every write returns a pending action the user confirms. Bill scanning chains OCR, AI interpretation and rule-based total checks.

Code Review | Python, LangGraph, FastAPI, Streamlit In development

- LangGraph agent that reviews GitHub PRs and **grounds findings against the diff**, discarding comments on files the PR doesn't touch; bring-your-own-key across five LLM providers, with keys never logged or stored.

Education

University of Delhi — Bachelor of Science (Honours with Research), Computer Science August 2022 – July 2026

Leadership

- **President**, Computer Science Society, University of Delhi
- **Student Judge**, Innovate X Hackathon 2026 (inter-college), Shyam Lal College, University of Delhi February 2026
